Relax With Raspberries

Start a hobby in your garden this very Spring with Raspberries. They are easy to grow, therefore not requiring a professional gardener to grow them. They will help you relax and forget the everyday worries, with their interesting growth and production of large, red, juicy fruits, and also—the sun-ripened, superb flavor of Raspberries picked fully ripe from your garden, taste better.

Start your garden this Spring with this new, everbearing variety SEPTEMBER, produces two full crops, one in June and the other in early September, continuing until frost. The berries are large, red, firm and of excellent quality. The plants are vigorous, hardy, and productive.

Chestnuting In Your Own Yard!

Remember the good old chestnuting days? Well, you can have them back again with our new:

FAST BEARING CHESTNUT TREES

No Spraying * Blight Resistant * Very Hardy * No Picking Problems

DEVELOPED from famous Chinese stock. They are highly productive, bearing nuts within two years after planting. They are rapid growers and will eventually develop into beautiful shade trees 30 to 40 feet tall. The chestnuts are full of flavor, sweet, (the children love them) and resembling the old-fashioned native nuts. When ripe the burrs split open and delicious chestnuts drop to the ground.

PLANT two or more trees for pollination, in fertile, well-drained soil. Shipment this spring at planting time.

PRICE for thrifty, three-year, 3 to 4 ft. trees, two for \$4.95 postpaid or two-year, 2 to 3 ft. trees, two for \$3.50 postpaid.
